PROJECTS

Simon Game: ⧉ | Html, Css, JavaScript
- simon had four different colored.Each button had a unique note.
- Players had to be able to repeat increasingly long string that simon created.
- Do not overtighten! You only need to tighten them enough to keep the modules on the mounting plate.

Shoping Website: ⧉ | Html, Css, Javascript
- using HTML, CSS, and JavaScript, featuring product listings, shopping cart functionality, and user interface enhancements.
- HTML structures content, CSS styles it, and JavaScript adds interactivity, creating dynamic, visually appealing, and functional web experiences..

Music Player: Data-Structure ⧉ | C++, DSA
- This project implements a playlist manager in C++ using linked lists and file operations. It supports adding, deleting, displaying, searching, and playing songs with smart pointers.
- It enhances skills in C++ programming, data structures, file handling, and memory management, crucial for developing robust software..
